

ABOUT US

Capere Surgical Systems is a one-stop orthopaedic solutions provider. Founded by leading hand surgeons of Singapore, and with an array of products in line, we aim to be the first Singaporean company to provide high quality orthopaedic products for the Asian market.

MISSION

Our mission is to restore movement and quality of life to patients and to address any unmet clinical needs of orthopaedic surgeons.

OPPORTUNITY

The global market for orthopaedic devices is estimated to reach billions of USD.

INNOVATION

Capere Tendon Repair (CTR)

Flexor tendon injuries are common injuries from accidents and contact sports. The current standard for such repair is by various suturing techniques.

CTR is a system comprising 2 stainless steel implants which are placed on both sides of the lacerated tendon, and sutured to secure them. The implants allow forces to be spread over a larger area therefore providing a stronger repair.

Capere Hand Device

Another most common form of hand injury is to the wrist. With the current method of care and devices in the market, therapists are not able to accurately determine their patients' recovery.

With the Capere Hand Device, the therapists can now accurately measure as well as monitor their patients' wrist strength and their rate of recovery.

Other Range of Products

At Capere we not only have our own innovation but also distribute a variety of products:

- Capere 3 ply masks
- Face Shields
- Gloves
- Covid-19 test kits
- Personal Protective Equipments (PPE)
